Subject: Revised FFS comment letter - without added Brock or Buxbaum text - For discussion at 11:00 call
Attachments: 07-22-21 -- EPA ltr - EMWMF-EMDF RAD WW FFS -- FINAL.doc

Importance: High

Hi Cathy,

I'm sorry that this has taken as long as it has. I have expanded the cover letter to layout the process and added that this is a living document. The DRAT originally had a hard time understanding the sequencing of FFS and ROD documents but when I explained it the DOE contractor completely understood and agreed it could be done.

I just saw your email regarding the addition of Martha's and or(?) David's email text on the discharge limits so this version does not contain that information. May I ask (please) that you either insert that text as a comment (and I will reorder the numbering if necessary) **OR** provide me with the specific language that you want conveyed to DOE so that it doesn't suffer from a complete rewrite by my missing the point. I admit that I am still wrestling with this concept and it is not clear to me. We can discuss this topic later when we have more time – I would like to understand it. I appreciate your help with that comment. Thanks.

I hope that you will have time to read the cover letter (minimum) and anything else would be fine. I did NOT change anything related to your comments – just turned off the highlights/comment fields.

Thanks very much for all your help with this document.

Gratefully,

Carl
